LIST OF OFFICIALS, 1934.

BROOKWOOD MENTAL HOSPITAL.

Medical Superintendent :

J. A. LOWRY, M.D.

Senior Assistant Medical Officer :

R. N. B. McCORD, M.B., B.Ch., D.P.M.

Second Assistant Medical Officer :

M. JOHNSTON, M.B., Ch.B.

Third Assistant Medical Officer :

R. W. MAXWELL, M.R.C.S., L.R.C.P., D.P.M.

Junior Assistant Medical Officers :

H. HANNESSON, M.R.C.S., L.R.C.P.

W. W. SINCLAIR, M.B., Ch.B.

Chaplain : Rev. D. W. MONEY, M.A.

Hospital Clerk and Steward : C. A. EKINS, A.R.San.I., A.I.S.A.

Matron : Miss D. L. FINNEMORE.

Head Attendant : W. H. ARTHUR.

Consulting Staff :

Surgeon and Gynaecologist—L. G. HIGGINS, M.B., F.R.C.S.(Eng.).

Ear, Nose and Throat Surgeon—T. B. JOBSON,

M.D., B.Ch., B.A.O., D.P.H., R.C.P.S.

NETHERNE MENTAL HOSPITAL.

Medical Superintendent :

L. M. WEBBER, M.R.C.S., L.R.C.P., D.P.M.

Senior Assistant Medical Officer :

J. H. EWEN, M.R.C.S., L.R.C.P., M.R.C.P.(Ed.), D.P.M.

Assistant Medical Officers :

W. HINDS, M.B., B.S., D.P.M.

F. B. McEVOY, M.B., B.Ch., B.A.O., D.P.M.

G. S. NIGHTINGALE, M.R.C.S., L.R.C.P., D.P.M.

M. W. MILLER, M.B., B.S.

Chaplain : Rev. G. AYLES-WATERS.

Hospital Clerk and Steward :

A. A. PASCOE, F.C.I.S., A.R.San.I., A.I.S.A.

Matron : Miss E. M. WEBB.

Head Attendant : A. F. THORNTON.

Consulting Staff :

Surgeon and Gynaecologist—G. H. STEELE, M.S.(Lond.), F.R.C.S.(Eng.)

Physician—C. C. TUDGE, M.B., B.S. (Lond.)

Ophthalmic Surgeon—F. J. S. BOOKLESS, F.R.C.S.

Radiologist—Dr. D. L. GREIG.

DUDLEY AUKLAND, *Clerk to the Visiting Committee.*

SURREY COUNTY MENTAL HOSPITALS

Annual Report of the Visiting Committee

(Pursuant to the Lunacy Act, 1890, Sec. 190.)

Presented to the County Council at their meeting held on the 26th day of November, 1935.

To the County Council of Surrey.

The Visiting Committee submit their Report for the year ended 31st December, 1934, together with the audited accounts to 31st March, 1935.

Seven meetings of the Committee and 29 meetings of the Standing Sub-Committees were held during the year. In addition, meetings of special Sub-Committees were held, and frequent inspections of the buildings and grounds of the two Mental Hospitals were carried out in accordance with the provisions of the Statute.

The normal accommodation in the two Hospitals at the date of presentation of this Report is as follows :—

<i>Brookwood.</i>	<i>Netherne.</i>	<i>Total.</i>
1,606 Beds.	1,480 Beds.	3,086 Beds.

On the 1st January, 1935, there were 30 patients chargeable to out-County Authorities, 97 private patients, 61 Service patients, and 49 patients received from other Mental Hospitals under Contract. The total number of patients in the two Institutions was 2,966.

The following tables show the numerical changes in patients at both Hospitals during the year :—

BROOKWOOD MENTAL HOSPITAL.

Remaining, Dec. 31, 1933.		Since admitted.		Discharged recovered.		Removed, etc.		Died.		Remaining, Dec. 31, 1934	
M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.
595	896	100	211	17	48	45	73	29	36	604	950
1491		311		65		118		65		1554	

NETHERNE MENTAL HOSPITAL.

Remaining, Dec. 31, 1933.		Since admitted.		Discharged recovered.		Removed, etc.		Died.		Remaining, Dec. 31, 1934.	
M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.
517	878	174	267	32	60	66	133	49	84	544	868
1395		441		92		199		133		1412	

The following table shows the number of deaths occurring at the Mental Hospitals during the past two years as compared with the average number of patients in residence :—

	1933.		1934.	
	No. of Deaths.	Percentage of average No. of Patients.	No. of Deaths.	Percentage of average No. of Patients.
Brookwood	... 81	5.31	65	4.27
Netherne	... 91	6.06	133	9.35

The total number of recovered cases was 157 as compared with 164 in 1933.

The buildings and machinery and other contents have been maintained in an efficient state of repair.

The following items of expenditure need no comment :—

	<i>Brookwood.</i>			<i>Netherne.</i>		
	£	s.	d.	£	s.	d.
Ordinary Repairs	6,484	9	7	6,759	12	0
Additions, alterations and improvements under £400	400	0	0	238	9	2
New buildings (voted by County Council) ...	288	17	0	3,001	4	3

Sums paid in respect of superannuation allowances during the financial year ended 31st March last, and in the previous year were as follows :—

<i>Brookwood.</i>		<i>Netherne.</i>	
1934-35.	1933-34.	1934-35.	1933-34.
£5,938 14s. 11d.	£5,721 1s. 1d.	£3,948 8s. 1d.	£3,376 15s. 10d.

Commissioners of the Board of Control visited both Mental Hospitals during the year, and their reports will be found on pages 28 and 33.

The Standing Sub-Committees were authorised to incur expenditure in training certain members of the nursing staff to make them capable of giving instruction in handicrafts to suitable patients at the two Mental Hospitals. The occupational therapy scheme is now working admirably, and much valuable work is being carried out to the advantage of both patients and Institutions.

Plans were approved for the re-construction of the kitchen and stores department at Brookwood. The Contract price is £16,207, and the work is proceeding satisfactorily.

The Council also authorised expenditure upon the provision of additional cottages for the Staff—six pairs at Brookwood and four pairs at Netherne.

The Mental Out-Patient Clinic held at the Royal Surrey County Hospital, Guildford, was closed as from 1st July, 1934, as, owing to the small number of attendances, the expenditure was not considered to be justified.

Dr. P. C. Coombes retired from the post of Medical Superintendent at Netherne and was superannuated as from 1st October, 1934. He had been in the Surrey Mental Hospital service since 1st July, 1909, and was appointed Medical Superintendent, Netherne, on 1st February, 1915. Dr. Coombes rendered loyal and devoted service and your Committee have placed on record their appreciation of his work.

The vacancy was filled by the promotion of Dr. L. M. Webber who had occupied the post of First Assistant Medical Officer at Netherne for the previous 19 years.

The Council confirmed the grant to Charge Nurse F. Roberts (Netherne) of a superannuation allowance at the rate of £52 per annum until she attains the age of 65, and thereafter £26 a year for life. This nurse was 55 years of age, and had completed 25 years' service when she was medically certified unfit to continue to perform her duties satisfactorily. She contracted out of the Asylums Officers' Superannuation Act, 1909, and the above-mentioned allowance was made under the provisions of the Lunacy Act, 1890.

Action was taken under the provisions of the Local Government and Other Officers Superannuation (Temporary Provisions) Act, 1933 to enable superannuation allowances to members of the Staffs at Brookwood and Netherne to be awarded on the gross values of positions held without reference to the "economy cut" in salaries and wages which was in force from 1st November, 1931, to 31st October, 1933.

Authority was given for the appointment of Consultant Staff at the two Mental Hospitals at a cost estimated not to exceed £500 per annum.

The average weekly cost of maintaining patients at the two Mental Hospitals during the past financial year was approximately 22s. 2½d. per head. The average weekly charge for Surrey rate-aided patients was 21s. 10½d.

Statements showing how the average cost at each Hospital was arrived at are printed on pages 12A and 12B.

At the date of this report the maintenance rate stands at 21s.7d., which is considered sufficient to meet all practical needs for the remainder of the current financial year.

The following is a record of attendances of members for the year:—

Name.	Visiting Committee (7 meetings).		Sub-Committees (29 meetings).	
	Summoned.	Attended.	Summoned.	Attended.

Wootten	2	2	2	2

The Committee once again desire to place on record their appreciation of the devotion shown by the Medical Superintendents, Officers and staff in carrying out their respective duties during the year.

Signed on behalf of the Committee this 11th day of November, 1935.

E. A. MEDUS,
Chairman.

APPENDIX I.

SOUTHWOOD HOUSE,

LINDEN PARK,

TUNBRIDGE WELLS.

25th May, 1935.

To the Chairman and Members of the

Surrey Mental Hospitals Committee.

GENTLEMEN,

I have to report the completion of the audit of your accounts, and of those of your officers, for the year ended at the 31st March, 1935.

The average weekly cost for the year of the maintenance of each patient at Brookwood and Netherne Hospitals amounted to £1 2s. 0·205d. and £1 0s. 4·981d. respectively.

Canteen Accounts.—Questions relating to the receipt and sale of goods in the canteens have been discussed with the Chairman, and also the officers concerned, during the audit. It was suggested that a modified system of stock and stores accounts should be put into operation as from the 1st of April last, and I understand that this recommendation will be acted upon.

Fidelity Guarantee Policy.—The present policy requires amendment, the names of officers no longer in the Committee's employ should be deleted, and the names of recently appointed officers should be added where necessary. The matter was fully discussed at audit and an assurance given that the policy will be amended as soon as possible.

My thanks are due to your officers for their courteous attention at audit.

I am, Gentlemen,

Your obedient Servant,

(Sgd.) E. H. V. WEIGALL,

District Auditor.

APPENDIX II

To the Visiting Committee of the Brookwood Mental Hospital.

MR. CHAIRMAN, LADIES AND GENTLEMEN,

I have the honour to present the 69th Annual Report of the Medical Superintendent, together with the Statistical Tables for the year 1934.

The following tables show the numerical changes in the patients during the year :—

					M.	F.	T.
Number of patients in Hospital on December							
31st, 1933	595	896	1,491
Since admitted	100	211	311
Discharges recovered		17	48	65
Removed	45	73	118
Died	29	36	65
Remaining on December 31st, 1934...	604	950	1,554

The Admissions.—There were 311 admissions, 106 more than in the previous year, and 68 more than in the year 1933.

47 were voluntary patients, 7 temporary and 257 certified.

The chief factors assigned in causation were : Heredity, 26 per cent. ; Critical Periods, 21 per cent. ; Senility, 11 per cent. ; Stress, 11 per cent. ; Syphilis, 3.8 per cent. ; Alcohol, 2 per cent.

The Discharges.—65 patients were discharged as recovered, giving a recovery rate calculated in the direct admission of 21.4 per cent., as against 28.29 per cent. last year. 44 were sufficiently well to be discharged as relieved to the care of their friends.

The Deaths.—65 patients died, the chief causes of death being Senility, 16 ; Nephritis, 10 ; Cerebral Haemorrhage and Thrombosis, 8 ; Cardiac diseases, 7 ; Cancerous growths, 3 ; and Tuberculosis, 2.

The death rate was 4.3 per cent., the lowest on record since the Hospital was opened in 1867, and is all the more remarkable as in 1933 the rate was only 5.5 per cent. Of the deaths, 37 were over the age of 65.

General Health.—The general health of the patients was good, with a marked freedom from epidemic disease. Owing, however, to our great accumulation of aged patients, the demands on the nursing resources of the Hospital were very heavy, and our accommodation for the sick and infirm will undoubtedly have to be extended and brought up to modern requirements. The strain thrown on the nursing staff has been great, and I must express my admiration of the manner in which the nurses and attendants of infirmary wards surmounted the difficulties which far too frequently presented themselves.

Accidents and Inquests.—One male and eight female patients sustained fractures of bones due to accidental falls. An inquest was held on one female patient who died in Hospital having sustained a fracture of the femur at her home, prior to her admission. A verdict of Accidental Death was returned.

Escapes.—12 patients escaped during the year, 10 of whom were brought back to the Hospital. Two remained at liberty, and were written off our books after the expiration of the statutory period of fourteen days. Six of these patients, including the two that remained at liberty, were on parole at the time of their escape.

Operations.—11 major surgical operations were performed during the year, five on members of the staff, and six on patients. All were successful except one for volvulus in the case of a mentally deficient boy whose general condition was poor.

A case of cancer of the œsophagus was treated with implantation of radon seeds by Mr. G. H. Steele, F.R.C.S., but the result was unfortunately not satisfactory.

We are greatly indebted to Mr. Higgins, our Consulting Surgeon, for his very prompt attention, and for the kindness and skill which he gives us at all times.

Visits.—Two members of the Board of Control visited the Hospital on February 8th and 9th. Their report is appended.

The Headquarters Inspector of the Ministry of Pensions visited and examined all the service patients.

The North-Western and North-Eastern Area Guardians Committees also visited the Hospital during the year.

Staff.—Dr. Hinds left on promotion to the post of Second Assistant Medical Officer at Netherne, and Dr. Rees resigned on appointment to the London County Mental Hospital Service.

Dr. Johnston was promoted to fill the vacancy caused by Dr. Hind's departure, and Drs. Maxwell and Hannesson were appointed to the two junior positions.

Miss Graham, Deputy Matron, left on appointment to the post of Matron at the Newport Mental Hospital, Isle of Wight. She had been here for five years, and I much regretted losing her services.

Mr. Wharf, Head Attendant, resigned on pension after 32 years' service. He took with him the good wishes of everyone, and left behind him a memory of loyalty, kindness and devoted service.

Miss Griffin, Chief Nurse, resigned on pension after 35 years' service. She had been Chief Nurse for 28 years, and had given most faithful service to the Hospital.

These two old servants had made the interests of the Hospital their own, and their going created a sense of personal loss.

We were fortunate to be able to fill all the vacancies thus made by promotions from our own staff :—

Miss Tebbutt as Deputy Matron.

Mr. Arthur as Head Attendant.

Miss Barrett as Chief Nurse.

The staff as a whole have performed their duties most satisfactorily, but as in previous years, we have been handicapped by the numerous changes which have taken place among the female junior nurses.

The usual lectures and demonstrations have been given to the Nursing Staff by the Medical Officers and the Sister Tutor. Nine candidates were successful in obtaining their Nursing Certificates, and twenty-nine passed the preliminary examination.

I am indebted to all the members of the staff for their loyal assistance, and should like to thank them for the manner in which they have assisted in the work of the Hospital.

Works Department.—The following work was completed during the year :—

Urinals and W.C.'s for Workshops.

Alterations to Front Hall, and Approach Road by Main Entrance.

Shelter in F.10.E. Garden.

Brookwood Farm. New Cowstalls.

Alterations to border Bagshot Road.

Two Foul Washing Machines for Laundry.

New Floor Male 10 Ward, and Female 9 Dormitory.

New and enlarged Windows, Male 1, and Female 1.

Cleaning out pond near canal.

In progress :—

Lockers and cloakrooms for F.1, 4, 8, 9, Wards.

Hard Tennis Courts.

Provision for Decoudon Ironing Machine for Laundry (additional).

General re-decoration of wards was proceeded with, and the structure of the Hospital kept in good repair.

General.—I have to report the gift of a valuable oil painting to the Hospital from Mr. Hutchinson Driver, a former member of the Committee. The picture is now hanging in our entrance hall.

In appreciating Mr. Hutchinson Driver's generosity, we had the additional pleasure of realizing that his old interest in the Hospital was still very much alive.

I cannot conclude my report without reference to the grave loss sustained by the Hospital by the death of Colonel Brodrick, the Chairman of the Mental Hospitals Committee.

He was a member of the Committee for 22 years, and Chairman for over 14 years. His undoubted ability was always at the service of the Hospital, and in any difficulty he was always ready with sound advice and immediate assistance.

In presenting this report, I again desire to thank you, Mr. Chairman and the members of the Committee, for your unfailing support, and for your personal kindness to me.

I have the honour to be,

Mr. Chairman, Ladies and Gentlemen,

Your obedient servant,

J. A. LOWRY, M.D.,

Medical Superintendent.

SURREY COUNTY MENTAL HOSPITAL, BROOKWOOD.

CHAPLAIN'S ANNUAL REPORT, 1934-5.

I beg to submit the following report of the duties carried out by my Assistant Chaplains and myself during the past twelve months. During that period I have been assisted by my Colleagues, the Curate-in-Charge of Holy Trinity, Knaphill (the Rev. C. E. Sylvester, B.A.), and the Curate-in-Charge of St. Saviour's, Brookwood (from June, 1934, to May, 1935, the Rev. J. L. Woods, and from May 15th, 1935, to date by the Rev. T. H. Wyatt, M.A.) ; all of whom have given me most zealous and capable support in the discharge of our Chaplain's duties.

In addition, I have again been assisted at Festival Seasons by the Rev. W. F. T. Hamilton, M.A., and on a few occasions in regard to daily prayers by Mr. W. J. Sidery, Schoolmaster at Knaphill Elementary School.

Chapel Services.—These have been continued as follows :—

1st Sunday in the month : 9.30 Ante-Communion Service and hymns.
10.0 Celebration of Holy Communion.

2nd Sunday in the month : 9.30 Morning Prayer with Sermon. (10 m.)
3.0 Evening Prayer with Sermon (10 m.)

3rd Sunday in the Month : 9.30 Morning Prayer with Sermon. (10 m.)

4th Sunday in the month : 9.30 Morning Prayer with Sermon (10 m.)
3.0 Evening Prayer with Sermon. (10 m.)

5th Sunday in the month : 9.30 Morning Prayer with Sermon. (10 m.)

Ward Services.—On the 1st Sunday two half-hour Services at 3 and 3.30 p.m. in M.11 and F.8 respectively.

On 3rd Sunday ditto in M.11 and F.10.B.

The attendances at the Chapel Services, especially in the morning, have been very well maintained if not increased. The behaviour of the patients has been exemplary, and much credit is due to the kindly and tactful management of both attendants and nurses. There is always an atmosphere of reverence and devotion and all join heartily in singing the Canticles, Psalms, and Hymns.

The average attendance at the monthly Celebration of Holy Communion has been well maintained at about 60. The behaviour of all who have attended this Service has been most quiet and reverent.

In regard to our Chapel Services I would again pay a warm tribute to the Organist, Mr. Graham, for his zealous and efficient services at the Organ and his painstaking care in training the Choir of Attendants and Nurses. I cannot speak too highly of the services of the members of our Chapel Choir. In spite of their small number they have always given a splendid lead to the congregations in the musical part of the Services, and in the prayers recited together with the officiating Chaplain.

There has also been very encouraging numbers present at the Ward Services, which are evidently appreciated by those who attend them.

Daily Prayers in the Recreation Hall.—These have been conducted on five mornings each week throughout the year by one of my two colleagues or myself, except on a few occasions last Winter when Mr. Sidery took them for one or other of us. The attendance, especially of male patients, has been fairly good and those who attend more or less regularly have seemed to appreciate the brief Service. The behaviour has been consistently quiet and reverent.

There has been regular visiting of the patients in the various Wards, Recreation Rooms, Workshops, and Airing Courts, on two or three and sometimes four afternoons every week by one or other of the Chaplains. Every endeavour has been made to listen with sympathy and patience to their troubles and give spiritual advice and comfort. When, as sometimes happens, relatives write to the Chaplain concerning one of the patients special visits have been made at the earliest opportunity to such and a letter of re-assurance afterwards written and sent.

In conclusion, I would like to take this opportunity of expressing my sincere appreciation of all the kind help which has been so readily given by members of the Staff, whether Attendants or Nurses to my colleagues and myself on our visiting rounds.

(Signed) DAVID W. MONEY,
Chaplain.

18th June, 1935.

BROOKWOOD MENTAL HOSPITAL.

REPORT FOR THE YEAR 1934.

ST. DUNSTAN'S,
HEATHSIDE CRESCENT,
WOKING.

June 13th, 1935.

I held a Service weekly for the R.C. Patients on Tuesday afternoons, with the exception of the first Tuesday of the month, when it was in the morning. I also paid ten special visits to patients on the danger list and administered the Sacraments to them. During the year six R.C. patients died.

H. E. PLUMMER,
R.C. Chaplain.

APPENDIX III.

NETHERNE MENTAL HOSPITAL,

COULSDON,

SURREY.

MR. CHAIRMAN, LADIES AND GENTLEMEN,

I have the honour to present the 26th Annual Report of the Medical Superintendent, together with the Statistical Tables for the year 1934. Sad memories are associated with this year. In September, the Chairman of the Mental Hospitals Committee died suddenly, and his untimely death was a great loss to the Committee and the mental hospitals. The late Colonel the Honourable A. G. Brodrick was greatly respected by patients and staff alike, and his kindly interest and genial personality are sadly missed by all.

At the end of September, Dr. Coombes retired from the post of Medical Superintendent after twenty-five years' service. He came here in 1909, and the following year was promoted Senior Medical Officer at Brookwood. Dr. Coombes was appointed Superintendent here in 1915. There were many difficult and troublous times during his superintendency—the war years, and the period when the new buildings were being built and equipped. On his departure, the patients and staff gave a convincing demonstration of their affection and respect for their retiring superintendent.

The Mental Hospitals Committee did me the great honour of appointing me Dr. Coombes's successor. Dr. Ewen was appointed first assistant medical officer.

The following is a summary of the changes among the patients during the year :—

				<i>Males.</i>	<i>Females.</i>	<i>Total.</i>
In the hospital on January 1st, 1934	517	878	1,395
Rate-aided patients	447	813	1,260
Private patients	28	65	93
Service class	42	—	42
Admitted during 1934	174	267	441
Total under treatment	691	1,145	1,836

Discharged in 1934 :—						<i>Males.</i>	<i>Females.</i>	<i>Total.</i>
Recovered	32	60	92
Relieved	51	81	132
Unimproved	15	52	67
Died	49	84	133
Remaining in hospital on December 31st, 1934 :—								
Rate-aided	474	803	1,277
Private	28	65	93
Service	42	—	42
Total						544	868	1,412
Average number resident during the year						541	880	1,421

The Admissions.—Of these 441, 404 were direct admissions—165 men and 239 women, being a decrease of 6 in the number compared with the figures of 1933. The chief ætiological factors were : Heredity, 17 per cent.; and Critical Periods, 33 per cent. In 76 patients Senility was ascribed as a factor. Stress accounted for 15 per cent.—economic and domestic worries. Disease of the Arteries was held responsible for another 5 per cent. of the cases. There was only an actual increase of seventeen patients in residence at the end of 1934, whereas in 1933 the increase was 169. The figures for 1934, unfortunately, do not indicate any diminution in the number of cases of mental disorder, but are accounted for by the fact that the admissions were less during the latter half of the year, as during that period all the Kingston cases were sent to Brookwood, instead of to Netherne as formerly, and Kingston provides a large number of admissions annually.

There were 47 Voluntary and 8 Temporary patients admitted. It is a pity the Temporary Section of the Act is not used more. At least 10 per cent. of the recent admissions could have been dealt with this way.

Discharges.—These numbered 424, of which 92 were discharged as recovered. The recovery rate, calculated on the direct admissions, was 21.6 per cent. Last year it was 25.8 per cent. The type of case admitted was not very favourable, and in 76 patients senility was a factor.

The Deaths.—133 patients have died during the year. The death rate, calculated on the average number resident, is 9.3 per cent. This rate is larger than 1933, when it was 6.06 per cent., but it may be pointed out that of the 133 deaths, no less than 73 were 65 years of age, or older. Post-mortems were held in 75 per cent. of the deaths. The chief causes

were : Senile Decay, 24.8 per cent., Diseases of the Lungs, 16 per cent., Heart Disease, 9 per cent. Six inquests were held during the year—upon 3 men and 3 women. In the first case the verdict was “Death from Senile Decay accelerated by Cellulitis of the Hand,” in the second, “Suicide by Hanging,” in the third “Accidental Death,” in the fourth, “Accidental Death,” in the fifth, “Accidental Death,” and the sixth, “Death in accordance with the medical evidence.”

Operations.—Mr. Steele, the honorary consulting surgeon, performed five major operations upon patients and two on members of the staff, all of which were successful. On December 1st, new arrangements were made for the appointment of a Consulting Staff to the Hospital. Mr. G. H. Steele, M.S., F.R.C.S., is now appointed consulting surgeon and gynæcologist. Dr. C. C. Tudge is Consulting Physician. Mr. J. S. Bookless, F.R.C.S., is the Consulting Ophthalmic Surgeon, and Dr. D. L. Greig the Consulting Radiologist.

Escapes and Accidents.—7 males and 4 females escaped. All the women and five of the men were away only a short time. One man was absent three days, being found in the Kent hopfields. Another patient escaped while out working and found his way to his home at Southend. At the urgent request of his friends he was granted four weeks leave of absence, and discharged on application at the end of that time. 11 women and one man received fractures due to accidental falls—each accident was reported at the time. A non-skid floor polish was introduced in October.

The general health of the patients has been good, in spite of the high death rate. There have been no epidemics. One male and one female patient had an attack of erysipelas and one female had diphtheria. One case of scarlet fever occurred in the male nursing staff. Six cases of General Paralysis of the Insane were treated with induced malaria by Dr. Ewen. Four of them, two men and two women, did very well and were discharged as recovered. The other two men showed no material change. It appears that the success of this line of treatment depends on the inoculation with malarial parasites at the earliest stage possible of General Paralysis.

With a view of starting Occupation Therapy, three nurses attended a course of instruction at the Dryad School of Handicrafts. A room has been converted into a workshop, and a start has been made in making rugs, raffia and basket work. In some of the wards, paper bags and envelopes are made.

A new “talking picture” cinema apparatus has been installed. The pictures are the most popular form of amusement for the patients.

There have been considerable changes in the medical staff during the year. Dr. Maxwell left in September to go to Brookwood. Dr. Palmer joined the staff on February 1st, and left on December 15th to enter the New Zealand Government Mental Service. He was a very keen medical officer, and did some good work in the pathological laboratory. Dr. Hinds joined on October 1st from Brookwood, being appointed second assistant medical officer in Dr. Ewen's place. Dr. Nightingale joined on October 1st and is in charge of the X-ray room. Dr. Miller replaced Dr. Palmer on December 15th.

The Commissioners of the Board of Control visited the hospital on November 8th. Their report is appended.

Deputations of representatives of the North, Mid- and South Eastern Public Assistance Committees visited on five occasions.

Works Department.—List of Works, 1934 :—

Airing Courts. New Courts laid out at Hospital Block.

Pair of Houses for Medical Officers.

Electric Light installed in intensive poultry-house.

Poultry Farm. 2nd intensive poultry-house erected.

Additional office accommodation provided.

Refrigerator improved and enlarged.

Sound Producing Apparatus installed in Recreation Hall, and Winding Room built.

Engineer's Stores. Additional shelves provided.

Hospital Block. Two new Padded Rooms provided.

Gas Hot Closets provided to all wards in old buildings (25).

New Farm Milk Float built.

Medical Superintendent's House Central heating installed. House re-decorated, inside and out.

Additional accommodation provided to Committee Lavatory.

Garage shutters provided, Medical Officers' garages.

New Farm Wagon built.

Fire Bells installed in firemen's houses.

Large Greenhouse heated.

Electric lighting system rewired throughout old buildings.

Painting.—Farm Implements. Railings, Female Admission Hospital, North Villa and F.7 to F.11 wards. Isolation Hospital. Windows, doors, gutters, etc. Outside Painting 43 Cottages, Netherne Village. Male 4 Ward re-decorated. Fire Boxes New Buildings repainted. Stores and Kitchen yards, windows, doors, gutters, etc.

The conduct of the staff has been very good. 29 nurses passed the preliminary and 4 the final examinations of the Royal Medico-Psychological Association. I wish to express my gratitude to my medical colleagues for their help, and also to the Matron and Head Attendant for their loyal co-operation and assistance.

In conclusion, I wish to thank all the Members of the Committee for their help and advice in carrying out my duties here.

I have the honour to be,

Ladies and Gentlemen,

Your obedient Servant,

L. M. WEBBER,

Medical Superintendent.

CHAPLAIN'S REPORT FOR 1934.

NETHERNE MENTAL HOSPITAL,

COULSDON.

During the year ending 31st December, 1934, the Sunday Services have been duly maintained without fail. The Rev. R. P. Ashe officiated during the vacation. Holy Communion has been celebrated every Sunday at 8.0 a.m. Morning prayer at 10.30 a.m. with an additional celebration of Holy Communion every other Sunday. Evensong at 3.30 p.m. On some occasions a further Evensong has been sung at 6.30 for the benefit of those living in the vicinity of the Hospital.

There have been public services in the Church on Good Friday, Ascension Day, Armistice Day and Christmas ; a Lantern Service was held in the Hall on the evening of Good Friday. The daily service in the Hall has continued throughout the year without a break, the number of men who attend has recently increased threefold. Services of a more or less personal nature have been held in the Wards.

Besides the small sums received at Holy Communion, three offertories were taken, viz.: at Easter, Harvest Festival, and Christmas. The total £11 3s. 10d. has been forwarded to the Mental After Care Association.

Wards, Villas, Airing Courts and Workshops have been regularly visited, which visits are invariably appreciated. Many a familiar face has disappeared from us this year. Members of the Staff have retired. Many of the patients have returned to their homes cured, let us hope, from any future relapse. Others have passed through the Valley of the Shadow, some of them rest in our Hospital Cemetery. They number 13 males, 19 females. They have been buried as honoured parishioners are buried in the outside world.

Relations with the Staff have been most cordial. They have always proved helpful. I wish to thank them and to express my deep appreciation to the Choir and Organist for all they have done to brighten and enrich the services of the Church.

Eleven members of the Staff have been prepared by me for Confirmation and were duly presented at Churches in the neighbourhood.

(Signed) GEORGE AYLES-WATERS,

Chaplain.

NETHERNE MENTAL HOSPITAL, COULSDON.

REPORT OF THE R.C. CHAPLAIN FOR 1934.

Services, 53.

Attendances, 1,131.

The attendances at the Services continued to give the utmost satisfaction, and the patients have repeatedly shown their appreciation of religious ministrations.

On occasions of public services and during my private visits to patients in the Wards, I have had evidence of the uplifting power imparted by a few appropriate words of consolation and the administration of the Sacraments, especially in cases of depression.

The discharge of my duties is greatly facilitated by the kind help of the Officers and Staff. My sincere thanks.

(Signed) J. J. TYNDALL,

R.C. Chaplain.

APPENDIX IV.

SURREY COUNTY MENTAL HOSPITAL,
BROOKWOOD.

9th February, 1934.

REPORT OF COMMISSIONERS OF THE BOARD OF CONTROL.

Compared with the buildings of some of the more modern Mental Hospitals, the buildings here present certain obvious disadvantages. After a full inspection, however, we are satisfied that the hospital continues to be well maintained and conducted under Dr. Lowry's administration.

There are to-day on the books of the hospital, 598 men and 899 women. One man and 6 women are at present on trial, leaving 597 men and 893 women in residence to-day. There are seven males and one female on a voluntary basis, and one female temporary patient. Private patients number 34, of whom 26 are in the Service or Ex-Service class, and there are twenty out-county patients, (12 men and 8 women) chargeable to 9 different authorities.

According to the returns made to us to-day there are 66 vacant beds in the male division and 50 in the female division; the corresponding figures at the visit of our colleagues last year were 62 and 56.

Apart from the installation of heating in the General Office, and the routine work of re-decoration, little has been carried out in the way of alterations and improvements during the year under review. We are glad to hear that the addition of a verandah to Female Ward 9 is contemplated, and the re-organization of the Kitchen and Stores—mooted some years ago, but shelved on account of the need for economy—is again receiving active consideration. Our visits to the departments in question left us in no doubt as to the necessity of this work being undertaken as soon as possible. Another point which struck us during our round was the paucity of visiting accommodation; we understand this question is being considered, and will be dealt with in connection with the above-mentioned scheme of re-organization.

The patients of both sections appeared contented and well behaved. We received no complaints save on the score of detention, and after inquiring into the matter were satisfied in each case that the patient was not fit for discharge. The clothing in both divisions was satisfactory; a considerable number of the women wearing their own clothes.

While the wards generally were nicely decorated and attractive, we thought that most of the pictures were somewhat drab and colourless, and the appearance of the wards would be enhanced by bright posters which can be obtained in great variety and at little expense. We were struck by the general deficiency of cloak-room accommodation throughout the hospital. Many of the patients, especially on the women's side, have considerable belongings of their own, and in some wards owing to the shortage of accommodation, the receptacles containing these belongings were stacked against the walls of the day-rooms. Lockers are now being provided as quickly as possible in the better conducted wards, but the shortage of accommodation for hanging overcoats, etc., will still remain. We hope that the possibility of erecting hanging cupboards in suitable positions will be explored and suggest that where this is done, care should be taken to ensure that they are deep enough to take coat hangers, the provision of which not only makes for economy of space but also tends to lengthen the life of the garments thus stored.

Parole within the grounds is allowed to 110 men and 70 women, and 2 wards in each division are open to the ward gardens, while 3 of the male and 2 of the female wards are open to the grounds. No full parole in the generally recognised sense is granted, but upon application to the Medical Superintendent, suitable patients are given written leave, covering the date of the visit in question only, entitling them to be absent from the Hospital for a stated period to visit specified places in the vicinity. This limitation is considered necessary on account of danger from the very heavy motor traffic existing in the area. Patients are also taken out for shopping expeditions.

Amongst the many questions discussed with Dr. Lowry was that of Occupational Therapy. At the present time some 62 per cent. of the men and 40 per cent. of the women are shown as employed and of these approximately 40 per cent. of the former and 50 per cent. of the latter are classed as ward workers.

It will be apparent from the above figures that there is very great scope at this hospital for this form of treatment, the benefits of which are now generally realized. As a result of our discussion we are satisfied that Dr. Lowry fully realizes the necessity for expansion and is anxious to make commencement as soon as possible. Proposals are now under consideration which would enable three specially selected certificated nurses to receive training in a variety of handicrafts and they would later be used as instructors for the remainder of the staff. Application

of the treatment will be started in selected wards on the female side, an Occupation Centre being subsequently provided in a building which is at present disused.

We realize that the organization of occupational therapy requires careful consideration and that progress must in the early stages be slow, but hope that the inception of this admittedly important adjunct to treatment will not be much longer delayed. We were glad to note that Physical Training classes are being held for a number of the younger male patients, under a qualified instructor, and in this connection we hear that several of the younger female nurses had voluntarily formed themselves into a class under the same instructor with a view to be able to take classes of patients in their own wards eventually.

We found a satisfactory number of patients employed in the various workshops, which included a bookbinding and printing department, in addition to the usual tailoring and shoemaking shops; in the latter department all boots, shoes, etc., needed for the hospital are made in their entirety. Visiting the lavatory which serves these workshops we could not but feel that the instalment of a modern urinal system would be of advantage.

Since the last visit the hospital has been free of any epidemic disease. A sporadic case of scarlet fever occurred in a member of the female staff, and one of diphtheria in a patient, the origin of which was untraced.

Dysentery and acute diarrhoea have been entirely absent for nearly five years and the last case of enteric (paratyphoid) occurred last year.

There are, however, a large number of patients of both sexes who have at some time suffered from dysentery or acute diarrhoea who are still under the usual restrictions as to occupations of such patients.

Six male and seven female patients are now suffering from active tuberculosis, all of whom are being nursed under conditions suitable for this complaint for which special accommodation exists.

The mortality rate for 1933 was, 8 per cent. for males and 4 per cent. for females which includes a somewhat large number of deaths from influenza pneumonia in the first two months which are not included in the period under review.

Sixty-five (36 male and 29 female) have died since the last visit of our colleagues, including 3 from general paralysis, 5 from tuberculosis, 6 from pneumonia, 11 from heart disease, and 17 from senile decay. (There is a large senile population.)

One patient found dead in bed was the subject of an inquest with a verdict of natural causes.

One patient of each sex was found to have a definite bed sore at the time of death, but we are satisfied that this infers no reflection on the nursing.

Post-mortem examinations were made in 37 instances—57 per cent. of the deaths. Permission is always obtained after death.

Two men and five women patients have sustained fractures, all accidental and unavoidable.

During our visit to the sick, we had many spontaneous references to the kindness and attention bestowed by both medical and nursing staff which from our observations we can thoroughly endorse.

Since the last visit the Isolation Hospital, formerly occupied by 23 female patients of the bedridden and the more or less senile type, has been closed, this block is to be used in future only for its original purpose. These patients now occupy two dormitories in F.2, which is a first floor ward, and this accommodation appears to us to be unworthy of the hospital. These dormitories are decoratively uninviting, the small high windows give no outlook and there is little or no opportunity for providing fresh air such as these patients might enjoy in ground floor accommodation with easy access to the garden.

One of us paid particular attention to the method of dealing with the fouled clothing and the disinfection of metal containers both of which appeared satisfactory.

The Clinic held once a week at the Guildford General Hospital by Dr. Lowry is, we regret to hear, very poorly attended. This may be due to the existence in the same institution of a much older established Neurological Clinic and possibly to the proximity of London with its facilities in this direction. We do, however, feel that amongst those discharged from the Observation Wards of the Guildford Poor Law Institution there must be many who would benefit from treatment at a local clinic if so directed.

The Staff of Nurses is as follows :—					<i>Male.</i>	<i>Female.</i>	<i>Total.</i>
Charge	14	16	30
Ordinary	89	114	203
Night	14	18	32

Fifty-six of the male and 34 of the female Nurses are certificated or registered as Mental Nurses. These figures shew an improvement on those of last year.

The Medical Staff remains the same as in the last report.

APPENDIX V.

SURREY MENTAL HOSPITAL,
NETHERNE.

9th November, 1934.

REPORT OF COMMISSIONERS OF BOARD OF CONTROL.

Since this Hospital was last visited, Dr. Coombes has retired from the post of Medical Superintendent.

Dr. Coombes entered the Hospital as Medical Superintendent on 1st February, 1915, and thus for close on 20 years has been engaged in dealing with the many difficulties inseparable from the administration of a large hospital. Amongst other events during his term of office we might mention that, during the years of the Great War, the Hospital had to contend with problems of restrictions of supply and shortage of trained staff, whilst for a period of seven years post-war, when the Hospital was functioning as an Admission Hospital for Service Patients from the Ministry of Pensions Hospital at Ewell, Dr. Coombes gave valuable help in the arrangements for the subsequent transfer of the patients to other Hospitals nearer their homes.

More recently Dr. Coombes was concerned in the provision of additional buildings for 480 patients, to which task he devoted untiring energy. The whole of the furnishing of these new buildings was carried out under the direction of Dr. Coombes and the Clerk and Steward, Mr. Pascoe. Dr. Coombes has been succeeded by Dr. L. M. Webber, formerly Deputy Medical Superintendent; to the former we wish many years of well-earned happiness in his retirement, to the latter we wish every success in his new and responsible post.

There are at present in residence in the Hospital 1,408 patients, in the proportion of 549 men to 859 women, 19 of the former and 21 of the latter being voluntary patients and one of each sex temporary patients. There are 29 men and 64 women classed as Private Patients. Out-County patients number 74 (52 men and 22 women) chargeable to about 14 different Authorities. Five men and four women are at present on trial.

From the Returns furnished to us to-day we observe that there are 36 vacancies for men and 27 for women, both by day and night.

The weekly maintenance charge for Home patients is 22s. 2d., while the charge for Private patients varies from 35s. 0d. to 63s. 0d. The average weekly maintenance cost as last ascertained was 20s. 7.140d.

During 1933, 63 patients were admitted on a voluntary basis and 6 as temporary patients, while up to date this year, 43 voluntary patients and 4 temporary patients have entered the Hospital. Thus the percentage of voluntary patients to the total direct admissions in 1933 (499) was just over $12\frac{1}{2}$, while the corresponding figure for this year to date is approximately $11\frac{1}{2}$. The percentage of temporary patients in relation to direct admissions is little over 1 in each case. From what we have seen in some other parts of the country in respect to admissions under the provision of the Mental Treatment Act, we feel convinced that the above figures can be considerably improved upon if active steps are taken to that end. Perhaps the Committee would consider the question of inviting the co-operation of the Public Assistance Committee with a view to ensuring that the Relieving Officers concerned are well versed in the provisions of and procedure under the Mental Treatment Act, and that each case with which they are called upon to deal is considered from the standpoint of its provisions. Action with a view to informing the local medical practitioners of the beneficial possibilities of the Act should also prove useful.

Amongst a variety of useful improvements carried out since the last visit may be mentioned: Installation of sound film apparatus in the Recreation Hall, and of wireless in a large number of the wards and villas. A pair of houses for Medical Officers have been built and a new greenhouse has been erected. A padded room has been provided in Female Ward 1 of the Hospital. Block and similar provision is contemplated in the corresponding Male Ward of that unit. The Medical Officers' bedrooms have been fitted with telephones. Fire bells have been installed in the Firemen's houses.

We found that patients apparently contented and happy for the most part and the only complaints we received were either the result of mental affliction or on the ground of detention. We made careful inquiries, where necessary, into the latter type of complaint, and satisfied ourselves of the need for further care and control.

Attention has been paid to the design of the women's clothing and we found the patients generally neatly clothed and well shod. A number of patients spoke to us of having lost touch with their relatives, some of whom on further inquiry we found to be dead or abroad. We hope, however, that all possible steps will be taken to establish, wherever possible, communication between patients and their relatives and friends.

The wards at this Hospital are of nice size and we found them generally in very good order. A pleasing feature on the female side was the abund-

ance of plants and flowers, even in the most disturbed wards. In female ward 7, the majority of whose occupants are Private Patients, we thought some form of screen between the baths would be of advantage. We understand that the charge made for patients in this ward averages £2 2s. 0d., per week, and venture to suggest that in the circumstances, the Committee might consider the provision of hot water to the lavatory basins. Throughout the Hospital we thought that the provision of coat hangers in the cloak-rooms would make for economy in space and lengthen the life of many of the garments now stored there. In the course of our visits to some of the ward kitchens we noticed that the gas rings were unprotected. We suggested to Dr. Webber the desirability of providing detachable shielded keys to those rings, particularly in the ward where the more acutely depressed patients are accommodated and he concurred in our view.

We could not help feeling that there was room for considerable improvement in the methods of transport of food to the wards and villas and of its distribution to the patients. The majority of the dinners that we inspected, chiefly in the Hospital Block, were cold. We have discussed this matter with Dr. Webber and made some suggestions, which we believe would effect improvement in this respect, for his consideration. In the bakehouse we thought that the dough mixer required some form of protection to prevent accident; we indicated the nature of the protection desirable to Dr. Webber.

Forty-two men and 19 women have parole within the grounds, to which 2 villas for each sex are open. Two male and 3 female villas are open to the ward gardens as are also the male and female Infirmary wards. On account of the traffic conditions in the neighbourhood, the granting of full parole is considered inadvisable.

A matter to which our colleagues drew attention last year is the need for organised occupation therapy at this Hospital. We understand that with a view of meeting this need, it is proposed to send three female nurses to a Handicraft Centre in London for courses of training in the very near future. We are glad to hear that a beginning is thus being made in this important form of treatment and hope that it will soon be found possible to extend it to the male division. A number of female patients, chiefly in the Admission Hospital, are encouraged to do various forms of fancy work, the proceeds of which are devoted to annual outings and also, we were surprised to hear, to the extent of about £30 to the provision of dentures—an expenditure which it seemed to us that this Fund should not be called upon to bear.

On the first day of our visit, which has occupied the whole of yesterday and to-day, we were very much interested in watching a quite recently formed class of young male patients doing physical training exercises under the instruction of a male nurse who was formerly a Physical Training Instructor in the Army. These patients had evidently been carefully selected and were many of them of the introverted type likely to derive much benefit from such activities. We thought that, when these patients had become more conversant with the various movements some form of music would be of assistance and add to the interest and that, later perhaps, special drill costumes might be found of advantage. We look forward to the time when exercises of this nature will be extended to the female division.

We received from Dr. Webber an account of the work carried on since 1st January of this year at the Out-Patient Clinic which he conducts weekly at Kingston General Hospital. It appears that the number of attendances during the period was 60, of which 10 were made by patients who had been previously seen at the Clinic. The remaining 50 attendances were made by new patients, of whom approximately one-third were sent by local medical practitioners for diagnosis.

The nursing care and attention provided by day appears to be satisfactory, but we feel that the arrangements for night nursing require reorganization and strengthening.

There is a large number of patients regarded as suicidal—25 male and 46 female—the great majority of whom are distributed in the observation dormitories and although Dr. Webber feels sure this number can be materially reduced, we suggest that with a numerically adequate staff to look after them they could be conveniently concentrated in fewer dormitories.

We are aware that all buildings are in telephonic communication with the medical officers—who have bedside instruments—and with the Matron; also that two or more day staff sleep in each dormitory, but there are occasions when the help of the latter would be requisitioned were they not asleep; in fact, sleeping staff is rarely called up. It is also highly desirable that both the sick and admission hospitals should have more frequent visits. We therefore suggest the addition of a night superintendent of officer rank—who shall be in full control of the night nursing throughout the Hospital and be available by telephone which should never be left unattended.

We inquired into the method of ward sanitation and find that this is by no means uniform throughout the hospital. In the sanitary annexes less care is given in most wards to the cleaning of sides, doors and hand

pulls than to pans and floors while in one instance we elicited the fact that scrubbing brushes are common to sanitary and general domestic uses.

In the fouled laundry section the soiled clothing is received in bundles from the wards instead of in metal containers such as are used for known infected clothing; the heavy soil having been removed in the wards. We took up this matter with Dr. Webber who will see that other instructions are given and has also promised to test the effluent from the washing machine from time to time.

In several dormitories both observation and non-observation, we noticed night commodes. We believe that their use should not be necessary.

We were glad to hear that a consultant medical, surgical and other specialist staff has been appointed since the last visit; these gentlemen will be acting in similar capacities at Brookwood.

The pathological laboratory under the direction of Dr. Palmer has considerably enlarged its scope and is now able to deal with practically any investigation required with the exception of the Wassermann reaction. Dr. Palmer is training one of the male nurses as laboratory assistant.

Malarial treatment for G.P.I. is carried out here using blood; one man and one woman were under treatment to-day in gauze protected rooms.

Dr. Nightingale who has recently joined the staff, is in charge of the X-ray department. He has experience of this work and we hope that his services may be utilized to the full in the early diagnosis of pulmonary tuberculosis the death rate from which is high in comparison with other Mental Hospitals.

Both dysentery and enteric fever have been almost absent from this Hospital for many years, and no case of acute diarrhoea has been returned to us.

A case of scarlet fever occurred amongst the male staff and a female patient had diphtheria two months ago. Apart from this the general health has been good and very few of the 52 male and 91 female patients in bed during our visit were so confined for physical reasons.

One male and 6 female patients are receiving open air treatment for tuberculosis.

The mortality rate of 6.8 per cent. for 1933, compares very favourably with the average for all Mental Hospitals.

In the 16 months which have elapsed since the last visit of our colleagues, 59 male and 95 female patients have died, of whom 40 were between 60 and 70 years of age and 52 were over 70.

The causes of death include 9 from G.P.I., 16 from Tuberculosis, 25 from Pneumonia (mostly of the terminal type), 23 from heart disease, 31 from Senility and 12 from psychotic exhaustion.

Five patients were found to have bedsores at death—a somewhat large number.

Autopsy was performed in 70 per cent. of the deaths. We hope that endeavours may be made to increase this percentage.

Two patients of each sex have been the subject of Coroner's inquiries—one a man, being a suicide. All the circumstances have been reported to our Board and no further comment is necessary.

Fourteen female and 2 male patients have sustained non-fatal fractures during the period under review—two were due to violence of other patients and the remainder from accidental falls chiefly in the wards.

A non-slip floor polish has been recently introduced and it will be interesting to note whether this has any effect on the number of accidents due to falls in the wards.

The present Nursing Staff is as follows :—

						<i>Male.</i>	<i>Female.</i>	<i>Total.</i>
Charge	14	23	37
Ordinary	73	99	172
Night	11	16	27

Three of the staff, including one male nurse, are doubly trained.

No female nurses are employed on the male side.

Fifty per cent. of the men and approximately twenty-four per cent. of the women are certificated or registered, and 20 men and 15 women have passed the Preliminary Examination only.

Dr. Webber has the assistance of Dr. J. H. Ewen as Deputy Medical Superintendent and of Drs. W. Hinds, F. B. McEvoy, G. B. Palmer, and G. S. Nightingale as Assistant Medical Officers.

(Signed) CYRIL F. PENTON.

SCALE OF ISSUES.

BREAKFAST.

Bread. M. $11\frac{1}{2}$ ozs. per day. F. 8 ozs. per day.
Margarine. M. and F. 1 oz. per day.
Cocoa. M. and F. 1 pt. each. Per 100 : 20 ozs. Cocoa, 40 ozs. Sugar, 8 pts. Milk.
Marmalade. M. and F. 2 ozs. each.
Sausage Meat. M. and F. 3 ozs.
Potatoes. M. and F. 3 ozs. each.
Ham and Chicken. M. $2\frac{1}{2}$ ozs. F. $2\frac{1}{4}$ ozs.
Corned Beef. M. 3 ozs. F. $2\frac{1}{2}$ ozs.
Porridge. Sugar $\frac{1}{2}$ oz. each. Oatmeal $1\frac{1}{2}$ ozs. each. Milk.

TEA.

Jam. M. and F. $1\frac{1}{2}$ ozs. each.
Tea. M. and F. 1 pt. each. Per 100 : 16 ozs. Tea, 40 ozs. Sugar, 8 pts. Milk.
Honey. M. and F. $1\frac{1}{2}$ ozs. each.
Seed Cake. M. and F. 3 ozs. each.
Currant Cake. M. and F. 3 ozs. each.
Fruit, Apples, Lettuce, etc., issued when in season in lieu of Jam or Honey.

DINNER.

1ST COURSE.

Roast and Boiled Beef. M. $5\frac{1}{2}$ ozs. F. $4\frac{1}{2}$ ozs.
Potatoes. M. and F. 6 ozs.
Vegetables. M. 6 ozs. F. 5 ozs.
Vegetable Soup. M. and F. 1 pt.
 Barley M. and F. $\frac{1}{4}$ oz. each
 Pea Flour „ $\frac{1}{8}$ oz. „
 Split Peas „ $1\frac{1}{2}$ ozs. „
 Rice „ $\frac{3}{4}$ oz. „
 Carrots, Celery, Onions, Turnips and Potatoes.
Roast Mutton. M. 7 ozs. F. 6 ozs.
Liver. M. 3 ozs. F. $2\frac{1}{2}$ ozs.
Bacon. M. 2 ozs. F. $1\frac{3}{4}$ ozs.
Meat and Potato Pie. Meat, M. $3\frac{1}{2}$ ozs. F. 3 ozs. Potato, M. 3 ozs. F. 3 ozs.
Irish Stew. M. and F. Meat 2 ozs. Carrots, Onions, Turnips, and Potatoes.
Salad. Eggs, Mustard, Sugar, Vinegar, Cucumbers, Onions, Lettuce, Radishes, Tomatoes.
Roast Pork. M. $5\frac{1}{2}$ ozs. F. $4\frac{1}{2}$ ozs.
Hot Pot. M. Meat $4\frac{1}{2}$ ozs. F. 4 ozs. Potatoes M. and F. 3 ozs.
Mint, Apple and Horseradish Sauces served with appropriate joints.

2ND COURSE.

Baked Plum Pudding. Flour M. 2 ozs. F. $2\frac{1}{2}$ ozs. Raisins, M. and F. $\frac{1}{2}$ oz. Dripping, M. and F. $\frac{3}{4}$ oz. Cream or Tartar, Carbonate of Soda.
Currant or Sultana Pudding. Flour M. 2 ozs. F. $2\frac{1}{2}$ ozs. Fruit M. and F. $\frac{1}{2}$ oz. Suet, M. and F. $\frac{3}{4}$ oz.
Milk Pudding. Cereal, M. and F. 1 oz. Sugar, M. and F. $\frac{5}{12}$ oz. Milk.
Fruit and Custard. Fruit, M. and F. 6 ozs. Sugar, M. and F. $1\frac{1}{2}$ ozs. Custard, M. and F. $\frac{1}{8}$ oz. Sugar, M. and F. $\frac{1}{4}$ oz. Milk.
Fruit Pies. Fruit, M. and F. 6 ozs. Flour, M. and F. 2 ozs. Dripping, M. and F. $\frac{3}{4}$ oz.
Treacle Pudding. Flour, M. 3 ozs. F. $3\frac{1}{2}$ ozs. Suet, M. and F. $\frac{3}{4}$ oz. Treacle, M. and F. $1\frac{1}{2}$ ozs.

DUDLEY AUKLAND, Responsible Accounting Officer.

19th day of June, 1935.

I hereby certify that I have compared the entries in this Financial Statement with the accounts of the Local Authority relating thereto and that the regulations with respect to this Statement have been duly complied with.

I hereby further certify that I have ascertained by Audit the correctness of this Statement, and that the expenditure of the said Authority during the year ended the 31st March, 1935, included in this Statement and allowed by me at Audit is One Hundred and Ninety-eight Thousand, Two Hundred and Nine-two Pounds, Five Shillings and Fourpence.

As witness my hand this 27th day of June, 1935.

A. R. H. HOBBS,
Asst. District Auditor
